SKILLS

Programming Languages:

Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), SQL

BI & Visualization Tools:

MS PowerBI, MS Excel (Pivot Tables, VLOOKUP, Charts), Google Sheets, Tableau

Other:

Data Cleaning, Exploratory Data Analysis, Data Modelling, Reporting, Team Collaboration

PROJECTS

Business Insights - Ecommerce Business (Python | SQL)

December 2025

- Performed **Exploratory Data Analysis (EDA)** to identify data quality issues and built an automated **ETL pipeline** to clean, standardize, and load data from CSV files into a database, reducing data cleaning time by 50%.
- Developed interactive visualizations using **Plotly** to analyze customer behavior, business risks, and trends in sales, orders, and profit, enabling data-driven decision-making.
- Conducted in-depth business analysis to uncover key drivers behind fluctuations in sales performance and profitability.
- Built linear trend-based forecasts to project future sales, orders, and profit, providing stakeholders with a high-level view of expected business performance.

Sales Insights - Brick & Motar Business (PowerBI | SQL)

August 2025

- Collected and documented sales requirements from stakeholders.
- Conducted exploratory data analysis using **SQL** to uncover key sales patterns and anomalies.
- Designed and developed a **Power BI** dashboard to analyze AtliQ Hardware's sales trends, enabling stakeholders to interpret data and make informed decisions.
- Delivered actionable insights through the dashboard that were projected to increase revenue by at least 7% in the following quarter.

Revenue Insights - Hospitality Domain (PowerBI | MS Excel)

August 2025

- Collaborated with the manager of the organisation to understand and identify the requirements.
- Cleaned sales data in **MS Excel** to improve accuracy and support effective analysis.
- Created a **Power BI** dashboard using three months of data to help AtliQ Grands analyze the cause of declining market share and revenue.
- Enabled the Revenue team to identify key revenue trends, providing insights projected to help regain up to 20% of revenue and market share within the next month.

WORK HISTORY

Bud Infrastructure Limited

Lagos, NG

Account Manager, Intern

May 2024 - September 2024

- Generated daily product performance reports using **MS Excel** (data cleaning) and Google Sheets (visualization), improving data accuracy and supporting faster, data-driven decision-making across teams.
- Developed weekly performance reports for top merchants using **MS Excel** (data cleaning and visualization), identifying upselling opportunities and areas for improvement that contributed to 10% increased sales potential.
- Improved merchant experience by gathering feedback through direct communication, documenting recurring issues, and tracking them systematically in **Google Sheets** for analysis and resolution, reducing unresolved cases by 20%.

Saiket Sytems

Maharashtra, IN

Business Analyst, Intern

September 2025 - October 2025

- Analyzed with **Seaborn** churn across tenure, contract type, payment method, and demographics, identifying senior citizens and short-term customers as high-risk segments.
- Recommended targeted retention programs for senior citizens and short-term customers, addressing the highest churn drivers and potentially reducing attrition by up to 25%.
- Created data-driven visualizations and reports using **Plotly**, enabling proactive engagement with at-risk customers and supporting strategic business decisions to improve retention.

EDUCATION

Covenant University, Ota, Ogun State

October 2025

Bachelor of Science in Computer Science (4.24/5.0)
